

TRANSCEND YOUR ENTERPRISE INTO GROWTH ORBIT

We offer **cloud based as well as on-premise**, cutting edge technology **Solution as a Service (SaaS)** especially targeted to SMEs. We bring Business Intelligence with a difference through our **Business Domain Expertise!**

With **Decintell Falco** our clients get end-to-end **visibility of their business health**, through pre-defined Key Performing Indicators (**KPIs**). Decintell Falco also offers option to gather and analyse equipment data through **Internet of Things (IoT) sensors and data loggers**.

Decintell Falco - Business Dashboard

Clients get 360-degree view of their KPIs in comparison with their budgets and targets. Our **business domain knowledge** allows us to create unique **KPIs for specific industries** that can be **further customized** to suite individual client needs.

- ❖ Engineering, Machine Tools
- ❖ Auto Components, Medical Devices
- ❖ Logistics & Retails

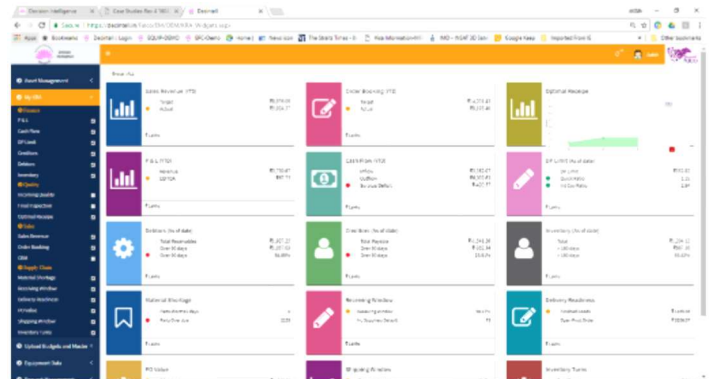

If you face ...

- Lack of Alignment between Business Goals, Business Process Metrics and Role wise KPIs'
- Lack of visibility of objective KPIs
- Lack of Visibility of performance against KPIs
- In-effective decision making due to lack of data
- Too much unproductive time on data collection

Decintell Falco is the right solution ...

Our clients have gained efficiency, through accurate and timely decision making, using this **ready to deploy solution**.

- **Pre-configured industry specific KPIs**, powered by our business domain knowledge
- Key KPIs under **Finance, Sales, Quality, Supply-chain, Projects** etc.

- User Management and **Role based controls, access & security**
- Inter-operability with **existing ERP system data sources** e.g. MSSQL, Oracle, DB2, SAP/HANA etc.
- **Free up costliest resource** from unproductive admin / data gathering work

Decintell Falco - IoT Dashboard

Our robust framework of Decintell Falco Dashboard allows to have **real time data visibility** from Internet of Things (IoT) sensors and data loggers. IoT dashboard, along with **optional Decintell Data and Weight Loggers**, helps you monitor performance of your equipment by capturing and analysing data through internet.

- ❖ Original Equipment Manufacturers (OEM) e.g. Machine Tools, Pumps, Chillers, Elevators
- ❖ Shop Floor / Factory Automation

If you face ...

- Lack of Visibility of Equipment field performance
- Long response time for repair and maintenance calls
- Low Spares and Consumable revenues

- Lack of best settings for maximum productivity
- Lack of optimal efficiency and reduced costs

Decintell Falco is the right solution ...

IoT dashboard helps **analyse the data for optimal and efficient equipment settings**, prediction of spares and consumables, maintenance planning and remote management of the equipment.

- **SMART Data Capture** directly from Programmable Logical Controls (PLC)
- Real Time Data Analytics and Equipment Health Monitoring
- Spares and Consumable Prediction
- No limitations on equipment parameters
- **Option for White Labelled Solution**

Solution Deployment

Both above services are available on **Cloud as well as On-Premise Solution**. Cloud based solution offers **Access Anytime Anywhere** to our clients.

Decintell Falco can be up and **running within a short period of time**. With a one-time setup, configuration cost and a very affordable monthly subscription, these services are a **very powerful tool for SME businesses**.
