

Falco SaaS - OPS

Smart OPS | Strong Outcomes

Falco Asset Manager – Control, Transfer, and Verify

From CNC to Cell phones – Know Where Everything Is, .. Always!

Register, Track, Verify, and Transfer Assets Across Plants, Projects, Countries and Personnel – with a QR Based Verification – No Blind Spots

What's Broken Today

- ❖ Equipment moves between plants / vendors – with no traceability
- ❖ No unified system for production assets + employee assigned assets
- ❖ Manual Registers = poor accountability and audit gaps
- ❖ ERP Generated asset codes often don't match physical trace

Falco Asset Manager – Enables

- ❖ End-to-end tracking of plant + utility + employee assets
- ❖ QR-Code Based Verification at every stage
- ❖ Dual asset code ERP + Falco self generated permanent tag ID
- ❖ Complete life-cycle visibility – Registration to Installation

Core Modules & Features

Asset Registry & Classification

- ❖ Capture Make, Model, Sr No., Specifications , Type
- ❖ Tag as Productive, Utility, Employee Assigned (EAA)
- ❖ Auto Assign unique Falco Tag-ID
- ❖ Enter ERP Asset ID for cross verification

Location and Ownership Mapping

- ❖ Asset Assign to SBU>Region>Country>City> Plant or Warehouse or Office
- ❖ Assign Cost Centre
